Super Kids English App

User Guide

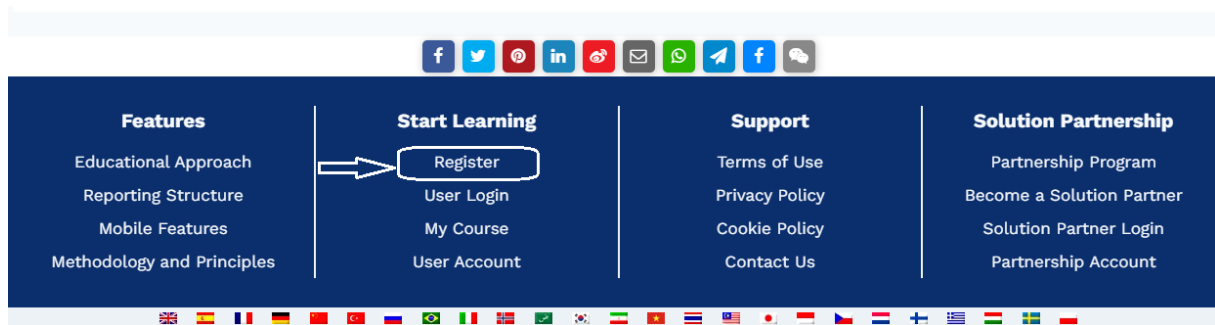

This guide aims to help users access the App smoothly, become familiar with its components, understand how they work, and navigate between them.

Written instructions are unnecessary for the learning process itself. All the the activities are designed for self-study, enabling children to navigate independently. If any difficulties arise, the helping hand feature offers visual prompts that support children as they progress through each activity. Children complete all tasks independently and gain greater self-confidence through exploration.

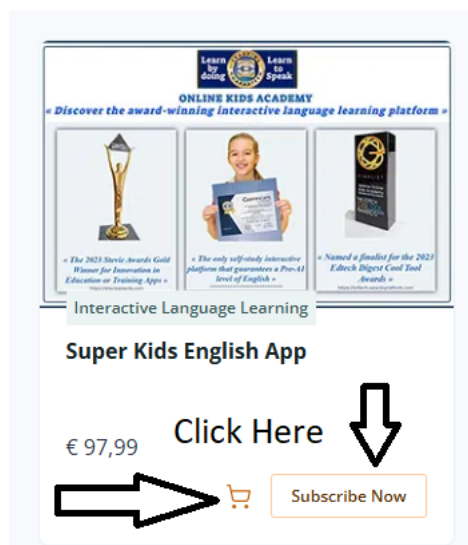

Each user is placed in a specific Section. Each Section is led by a dedicated Section Head. The Section Head initiates and manages the learning process for users in their section, tracks each user's progress and development, and shares the results with parents. This allows children to focus on their studies independently, dive into learning without distraction, while parents handle other priorities.
